

Background:

Petro Sahel Ofogh Kish Company (PESOK) was established as one of the subsidiaries of Petroiran Development Company (PEDCO) in 2011. Since then, the company has acquired the certificate of competence for providing consulting services in three sub-branches of oil and gas transmission lines, oil and gas exploration and extraction studies, Oil and Gas Refinery and Petrochemical Industries as well as the Certificate of Contracting Competence in two sub-branches of Oil and Gas and Industry and Mining, with maximum use of PEDCO experiences and technical knowledge in the field of engineering and project services.

Unit.9, No.141, Nelson
Mandela Street, Tehran,

Petro Sahel Ofogh Kish PESOK

We are Committed to Excellence

Company Vision

Development of commercial activities inside and outside of the country as an economic enterprise based on the knowledge and operational experience of experts in order to become one of the top 20 Iranian engineering and construction companies in oil, gas and petrochemical industries.

Company Mission

Petro Sahel Ofogh Kish Company (PESOK) provides engineering, procurement and execution services of the projects with optimal quality, on time with minimum cost without damaging the environment in order to synergy, value creation and help development of national economy.

PESOK certifications

Certificate of Consultant in Oil and Gas Transmission Lines
 Consultant Certificate in Oil and Gas Exploration and Extraction Studies

Consultant Certificate in Oil and Gas Refinery and Petrochemical Industries

Certificate of Oil and Gas Contracting Competence

Certificate of Industry and Mining Contracting Competence

Quality management certifications:

ISO 9001: 2015, ISO 14001: 2015, ISO 45001: 2018,
 ISO/TS 29001: 2010
 HSE-MS (OGP Model)

Capabilities

PESOK Surface Capabilities include:

- Perform conceptual and feasibility studies
- Perform Front End Engineering Design (FEED) studies
- Perform detail engineering
- Provide project management services
- Provide procurement services and engineering
- Provide operational and executive services of projects
- Pre-commission, commission and operation
- Provide Intelligent pigging services for pipelines cooperating competent companies

PESOK Sub-Surface Capabilities:

Having local experts and cooperation with reputable international companies, PESOK provides valuable services in the upstream sector, as follow:

- Carrying out and supervising comprehensive studies of oil and gas fields including studies on geology, geophysics, petro-physics, reservoir engineering and production, drilling engineering
- Carrying out and supervising study activities concerning exploration, extraction and development of oil and gas fields
- Drilling design and engineering of oil and gas wells and supervising drilling operations and wellhead geology Management and supervising production and optimal extraction from oil and gas fields
- Carrying out all engineering activities for operation of oil and gas wells, such as preparing work-over plans, well logging, perforation and well testing, etc.

Ongoing Projects

■ Construction of flow lines and development of Kaboud Manifold as EPC Contractor

End User: National Iranian South Oil Company (NISOC)

Client: Pars Energy Gostar Drilling and Exploration Company (PEDEX)

Project Description: Construction of wellhead facilities and construction of flow lines (for 8 wells) and connection of these pipelines to Kaboud manifold as EPC contractor to increase production of 4400 barrels oil in Kaboud oilField

■ Provision of consulting services regarding comprehensive studies of Sarvestan and Saadatabad fields

End User: Iranian Central Oil Fields Company (ICOFC)

Project Description: Carrying out studies including geophysics, geology, petro-physics, reservoir engineering, surface facilities and understanding wells and reservoirs behavior, predicting the future performance of wells and reservoirs, preparing simulation models including material balance, static and dynamics, surface and their simultaneous implementation to achieve the optimal scenario, review of various reservoir development plans and conducting studies on economics, optimization of production and reservoir management, to review enhance oil recovery and improved oil recovery scenarios.

■ Provision of expert and consulting services in the field of design and engineering

Client: Petroiran Development Company (PEDCO)

Project Description: The contract entails provision of expert and consulting services required by the client in the design and engineering of surface as well as sub-surface projects, including development of oil and gas fields, drilling operations and work-over of wells in the field of oil, gas and petrochemical industries as required by the client's operational plan

■ Provision of services for conceptual studies, Basic Design, FEED and preparation of EPC tender document for Toos Gas field development

Client: Iranian Central Oil Fields Company (ICOFC)

Project Description: The contract entails provision of services for conceptual studies, Basic Design, FEED, Geotechnical, Mapping, environmental and HAZAP/HAZID Studies and preparation of EPC tender document for Toos Gas field development.
