About Us

Petroiran Development Company (PEDCO) is the first Iranian local general contractor, which was established in 1997 as NIOC execution body for execution of offshore and onshore projects in territory.

When NIOC switched to new oil and gas contracts known as IPC, PEDCO evaluated and approved as one of Iranian pioneers in E&P activities.

Vision

We strive to transform into an internationally reputable, independent company in the field of exploration and production (E&P).

Objectives

- Integrated oil and gas fields' development.
- Maximizing utilization of local company's capabilities.
- Establishment of new executive structure and approach, to accelerate achievement of projects objectives.
- Achieving a desirable position in various international markets in oil and gas industries.
- Providing financial resources.

Our Activities

- Exploration and prospect evaluation
- Integrated reservoir management
- Integrated production management
- Management and supervision of design, construction, installation, commissioning and operation of onshore and offshore facilities
- Drilling engineering and operations

Business Chart

Completed Projects:

- FPSO Conversion
- Development of South Pars Oil Layers
- Providing of Drilling Rig for South Pars Phase 20 (By Subsidiary Company)
- Subsea Pipe line From Sirri Island to Assalouyeh
- Construction and installation of Foroozan Jackets and Pipe lines (By Subsidiary Company)
- Development of Azadegan Oil Field (Early Production Phase)
- Development of Salman Oil & Gas Field
- Development of Nosrat and Farzam Oil Fields
- Development of Foroozan and Esfandiar Fields
- One Appraisal Well Drilling in Hengam Field
- Development of Jufeyr Oil Field (Early Production Phase)
- Providing Integrated Drilling Services for IOOC in Persian Gulf (IDS1-) (By Subsidiary Company)
- Aboozar Gas Flow Increase to Dorood II(Completed-By Subsidiary Company)
- Hiring of One Offshore Drilling Unit for Foroozan Field (By Subsidiary company)

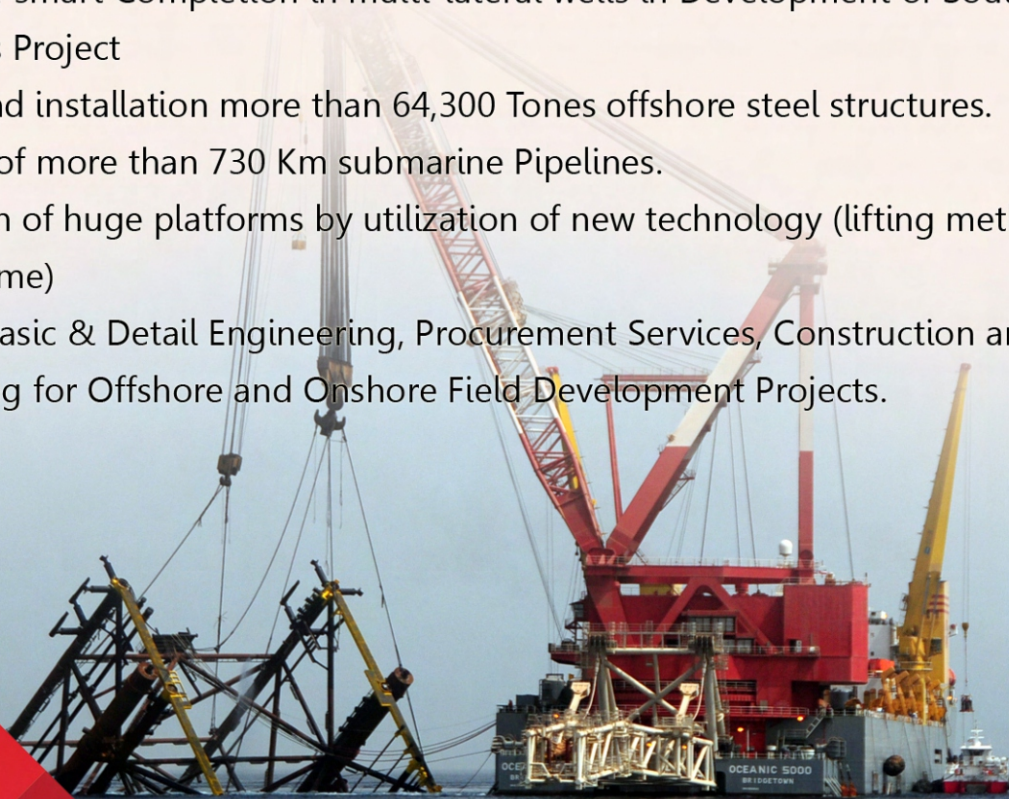

Current Projects:

- Providing Integrated Drilling Services for IOOC in Persian Gulf(IDS-2)
(By Subsidiary Company)
- Sirri EPDF project
- Providing integrated Drilling Services for POGC in Persian Gulf

Our Achievements

- Execution of eight Mega projects.
- Production of more than 650 million extra barrels of crude oil from Salman, Foroozan, Azadegan, Nosrat and South Pars oil layers on joint Fields and Jufeyr up to Now.
- Oil Production Improvement on onshore and offshore fields' development equal to 150,500 BPD.
- Creating more than 56 Million man-hours direct and indirect job opportunity and utilizing Iranian Companies.
- Drilling & work over 112 wells (86 wells offshore, 26 wells onshore)
- 323,851 meter Drilling/ Workover footage up to now (253,351 m offshore and 70,500 m onshore)
- Utilizing Semi-smart Completion in multi-lateral wells in Development of South Pars oil layers Project
- Fabrication and installation more than 64,300 Tones offshore steel structures.
- Construction of more than 730 Km submarine Pipelines.
- Transportation of huge platforms by utilization of new technology (lifting method for the first time)
- Provision of Basic & Detail Engineering, Procurement Services, Construction and Commissioning for Offshore and Onshore Field Development Projects.

Tossee Petroiran Kish Co

Tossee Petroiran Kish Company focuses on procurement activities.

This company intends to be active as an international enterprise in the value chain of oil and gas industry.

The main activities of company are:

- Supplying materials and equipment in oil and gas industry
- Performing procurement services such as: Import, Export and customs clearance
- Identifying new sources for required materials and services
- Evaluating suppliers capabilities according to the specified customers instructions
- Providing Logistics and supporting services for Offshore and Onshore operational sites

Tossee Petroiran Kish Co.

About Us

Petro Sahel Ofogh Kish (PESOK) as PEDCO Group subsidiary Company has been set up to utilize PEDCO's comprehensive and specialized engineering experiences to serve for supply and construction of offshore platforms and onshore plants through EPC, EPCIC and EPCF or simpler fabrication contracts.

Thanks to relying on our powerful technical capabilities, PESOK could add value to every phase of a study or project execution; from front-end analysis and risk based decision making through to technology development, project delivery and operational support.

PESOK is offering end to end engineering consultancy services to the oil and gas industry.

PESOK provides multi- disciplinary services to render practical diverse solutions no matter the challenge. World-class consulting services are delivered by an experienced that is backed up with years of experience.

Our project teams derive solutions designed to meet the technical, commercial and strategic requirements specific to each assignment

Vision

Our goal is to be a reputable, progressive and innovative in end to end engineering services to the oil and gas industry that consistently provide the most competitive and highest level of services to our clients.

We are committed to drive multi- disciplinary services to render practical diverse solutions no matter the challenge.

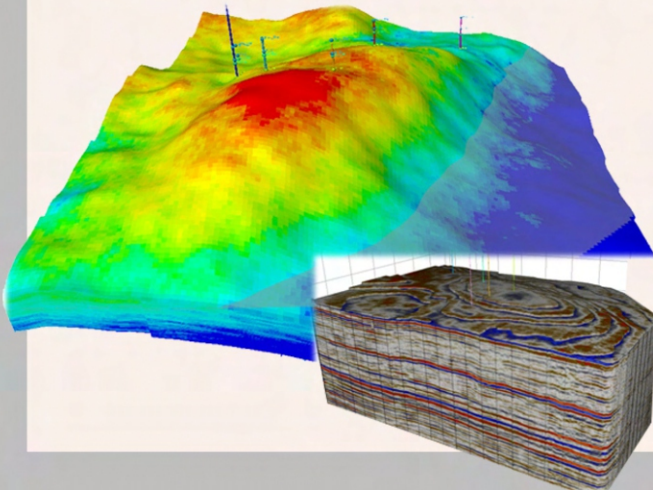

Objectives

Our diverse portfolios of services are covering E&P components consist of:

- Exploration,
- Integrated Reservoir Management,
- Integrated Production Management,
- Drilling Operation and Engineering,
- Conceptual design,
- FEED design,
- Basic design,
- Detail design,
- Software and equipment procurement,
- Construction,
- Pre-commissioning,
- Commissioning,
- startup and
- Project Management Consultancy

to our customers through the entire oil and gas project lifecycle. Our potentials on handling complex and risky operations set us up apart from our competitors.

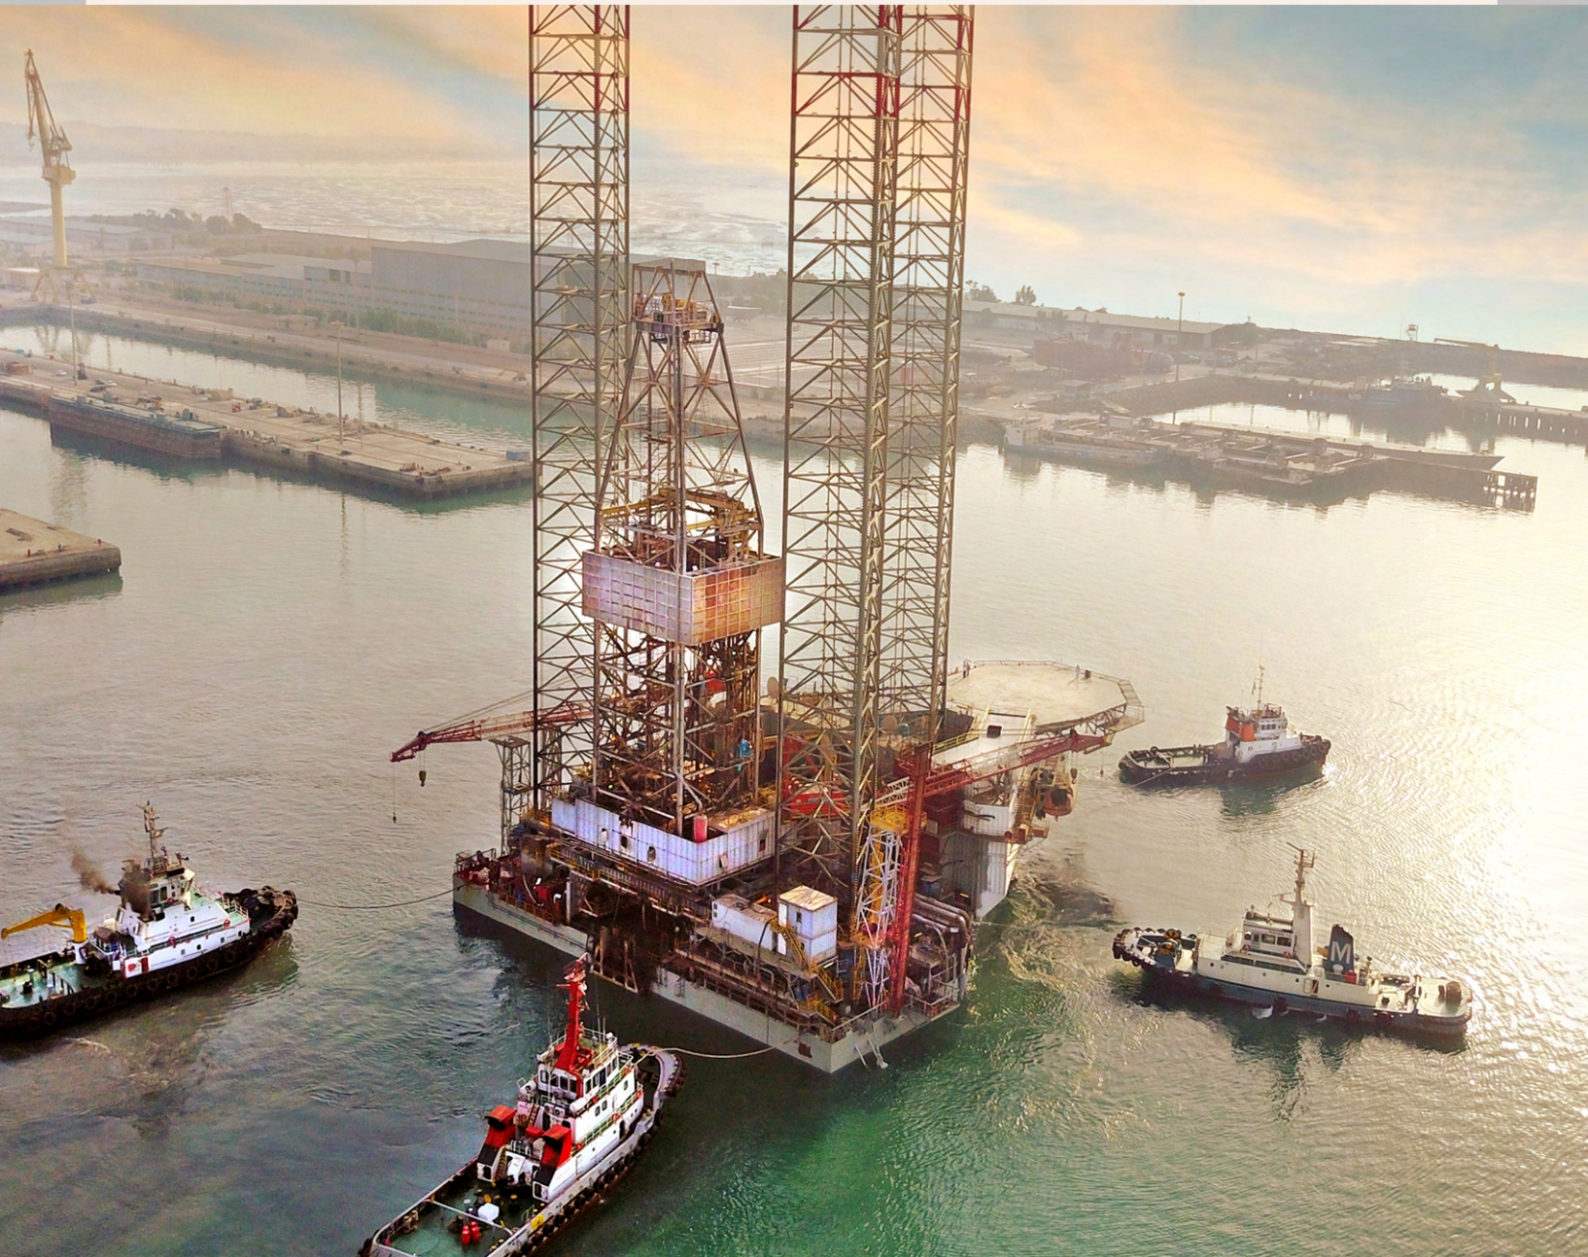

Our Activities

- Conceptual feasibility studies
- FEED studies
- Execution of offshore, and onshore projects through EPC, EPCIC, EPCF contracts
- Basic & Detail design
- Management Contracting
- Well modeling and improvement of field production
- Enhancing Oil Recovery Design(EOR)
- Providing In Line Inspection (ILI) Services for onshore and offshore pipelines
- Production super vision and Performance evaluation

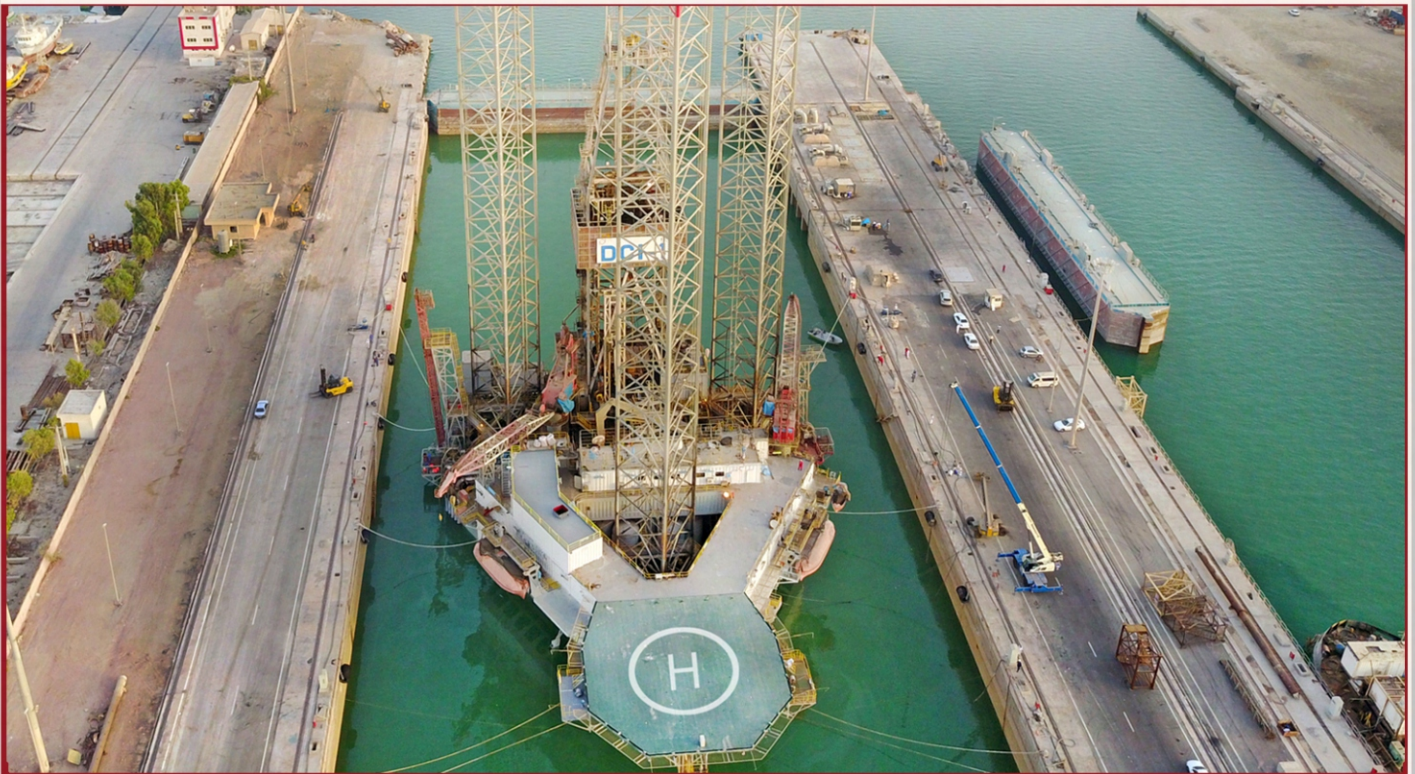

DRILLING COMPANY INTERNATIONAL

Drilling Company International (DCI) was established on January 22th 2009 as executive subsidiary of PEDCO to provide offshore / onshore drilling rigs and drilling services.

DCI Activities:

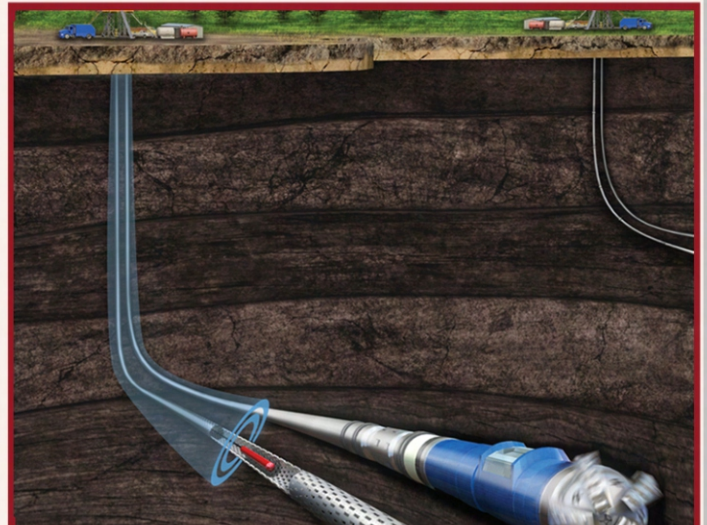

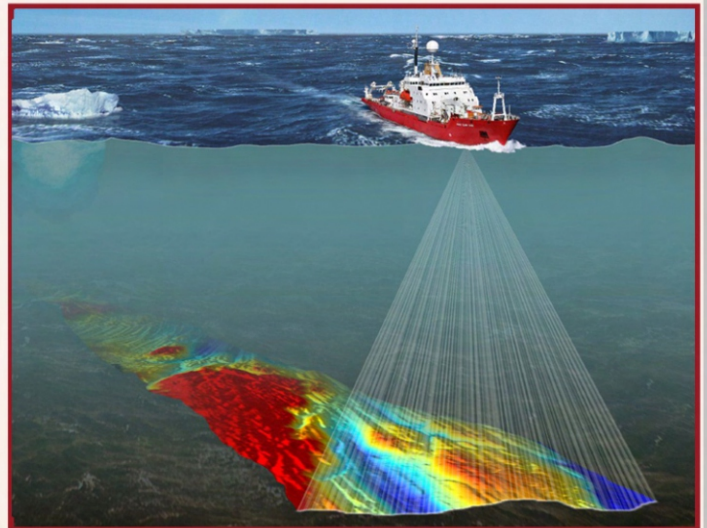

- Providing rig and well services for drilling industry
(DCI owns two cyber SUPER M2 Jack-up Drilling Units: DCI1- and DCI2-)
- Providing offshore maritime solutions
- Providing logistics services
- Providing engineering solutions for offshore jack up drilling rigs
- Providing ship management services
- Providing engineering for overhauling jack-up drilling rigs (Dry Docking Activities)

We manage and provide different technical services in house or through local & international reputable service companies for all drilling projects.

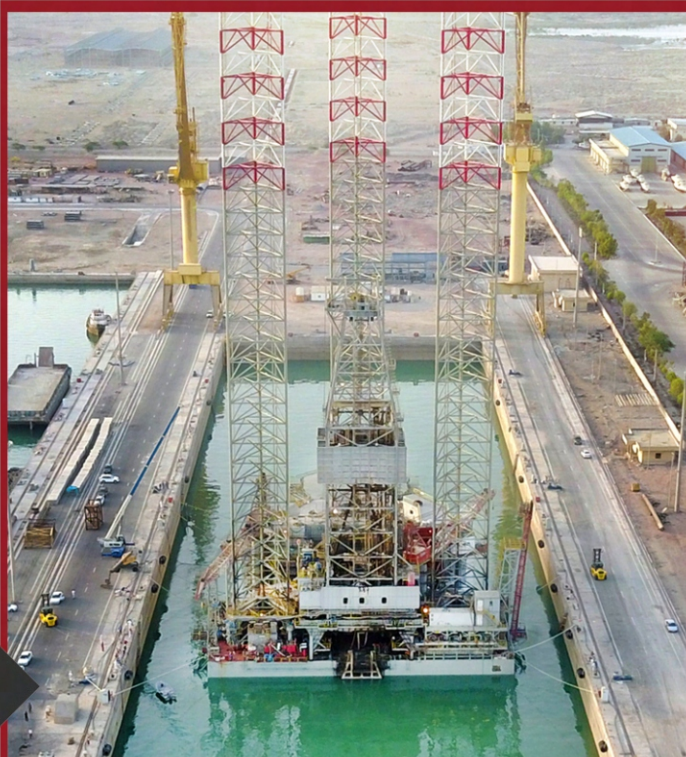

Drilling Services As Integrated Drilling Services (IDS) :

- Project Management
- Directional Drilling
- Drilling Fluid
- Logistics
- Casing & Tubing Running
- Geotechnical /Geophysical Sea bed Survey & Rig Positioning
- Cementing
- Liner Hanger
- Whipstock & Window Opening
- Wellhead
- Well Testing and Stimulation
- Coiled Tubing
- Wireline
- Fishing
- ROV / Saturated Diving
- H2S

DCI1- and DCI2- Major Specifications:

- DCI rigs are capable of drilling in 7000 meter deep wells in 300 feet deep sea and can handle up to 15 wells without changing their position.
- These two rigs are equipped with Simultaneous Pipe Handling System (SPHS).
- These rigs are self-elevated mobile offshore drilling units accommodations for 114 people.
- The rigs have their own facilities for generation of 8 Mega Watts of electrical power and potable water.
- These two rigs are equipped with three sets of 2000 HP mud pumps
- These two rigs have been designed according to requirements of American Bureau of Shipping (ABS) and are new certified by NKK class requirements.

DCI projects:

- Integrated Drilling Services (IDS1-and IDS2-)
- South Pars Oil Layer (SPOL&SPOL-A2)
- Jofeyr Oil Field Development
- South Pars Development - Phase 20 (SPD20)
- Froozan Oil Field Workover & Re-entry wells

Offices:

Tehran: DCI Office is located in Tehran 2350 m² of real state .

Kish Island: DCI logistics office in kish Island is equipped with all facilities required for supporting drilling operations in Persian gulf including 60000 square meters open yard and 5500 m² and 500 square meters of warehouse for storage of materials and equipments.
